

Product information

StripFix[®] - Fixation frame for RoboStrips[®] (low profile)

StripFix[®] is a fixation frame which combines several PCR-strips up to 12-strip modules to assemble a standard microplate. The frame was developed to simplify manual handling procedures with 8-Tubes/strips (0.2 ml) for use with conventional and real-time PCR/RT-PCR/Immuno-PCR but also allows the use with automated washers and other liquid handling robotics. Generally, there is no influence of PCR-Signals triggered by the use of StripFix[®].
